(54) Abstract Title: Drug dispenser with communications line

- (57) A Pharmacopoeia 1 is a portable device, that includes drug dispensing, reminding and monitoring support, which is connected to a mobile station MS2 and an audio device AD3. The Pharmacopoeia can read ASCII strings received at the MS2 and if a command string then dispense a defined drug, deliver the prescription or if a message string allow the user to listen, via an AD3 to the ASCII reminder message being read. The Pharmacopoeia therefore supports the remote modification of drug dosage, the proscription and when the drugs are delivered. The Pharmacopoeia may include a mobile station 2 an audio device 3 a microcontroller 12 and wireless interface connections 4, 6. It may also include a data storage medium 10 and an on-the-fly language translation module 11.
